

DLB CONSULTING, LLC

Charting your course for financial success

DLB Consulting, LLC is celebrating its 10th Anniversary this month (February 2007). This accounting services business was begun by Debra L. Boyd out of her Tempe home (in 1997), and since then it is grown into a thriving small business with employees serving the metro-Phoenix area. DLB provides consulting, training, and accounting services to contractors, manufacturers, and other small businesses. It has prospered through client referrals and advancements in technology (that make it possible to do the work remotely).

Small businesses are the heart of America and yet 80% fail within the first five years. DLB's main goal is to get the company's accounting cleaned up and using accurate financial reports so that as a team DLB and the client can make wise decisions in helping that company be successful. DLB wants to see small businesses succeed.
