

DLB CONSULTING, LLC

Charting your course for financial success

January 20, 2003

FOR IMMEDIATE RELEASE:

DLB Consulting celebrates its fifth year.

(Tempe, AZ) Despite the current economic climate, local firm DLB Consulting prospers into its fifth year. Debra L. Boyd founded the firm in 1997, starting with a focused strategy centered on quality accounting services and support. This vision led to five years of expansion fueled by customer satisfaction. In a time when most technology firms are stumbling, DLB Consulting expanded successfully into IT consulting, providing the technology expertise behind many East Valley small businesses.

And the key to flourishing when times are tough? Debbie Boyd credits her individualized approach to accounting solutions; each client receives customized services, tailored to their size and specific industry. Solutions are selected after objective evaluation, always with the client's satisfaction foremost in mind. Such individual attention has paid off for DLB Consulting, with a large percentage of their business springing from client referrals.

In the past year, America watched as billion dollar megacorporations crumbled, sending shockwaves through the national economy. Nonetheless the outlook for DLB Consulting is sunny, largely based on their key insight that *strong ethics are the foundation of prosperity*. DLB Consulting is committed to enriching their clientele through meaningful relationships, relationships based on trust and open communication. The result: Five years of success!
